Professional Summary

I am a Full-Stack developer with a focus on Front-End using React. I can also build an Express Server backend with REST APIs using Node.JS.

Hard Skills

Languages: JavaScript (ES6)/TypeScript, Node.JS, CSS/SASS, HTML
Frameworks/Libraries: React.js, Express, Mongoose, React-Testing-Library, Jest, Material UI, Bootstrap
Industry Skills: Git/GitHub, Semantic HTML/accessibility, Testing, MongoDB

Soft Skills

Customer service, Communication, Creative Thinking, Learning, Patience, Leadership, Training, Project Planning, Problem Solving, Bilingual (English/French)

Education

Udemy: The Web Developer Bootcamp 2022, ongoing
VIU: Electrical Apprenticeship Program, 2016-2020

Personal Projects

Perfect Pup : A MERN Stack Dop Adoption website. The dogs are uploaded using a CRUD app, and fetched from MongoDB via a REST API.
Portfolio Website: A React App to showcase my projects. It features Typescript, CSS animations and use of the Intersection Observer to trigger them.
Sudoku Game/Solver: A Sudoku Solver and Generator which can solve simple puzzles using human logic, or harder puzzles using recursion . My first project and one which taught me a lot about recursion, DOM manipulation and Algorithms & Data Structures.

Volunteer Experience

Civic Tech Fredericton, www.CivicTechFredericton.com - Sandi MacKinnon, Organizer (506-444-1982)
Front-End developer, November 2021 - current
